The new  
**ESCORT COMBI**

The Escort Combi L dash (right), features a quartz analogue clock, three-speed heater fan and illuminated instrument switches. In-car entertainment is provided by the Ford F21 push-button radio.

Listening to customers and responding to their requests has helped make Ford one of Britain's biggest and best manufacturers of motor vehicles.

That concern for people and their needs has led to an extension of the Escort range of load carriers by the addition of the Combi, a dual purpose vehicle for both business and personal use.

Ideal for in-town delivery work and long journeys for business or pleasure, the Combi provides everything you need in a hard-working light commercial vehicle. Everything from comfort, convenience and that good-to-drive feeling to low operating costs and an appropriately

businesslike 42.4 cubic feet\* of flat-floored payload space.

Other vital statistics include 60 inches of load length, a maximum width of 51 inches, with 38 inches between the wheel arches, and 32 inches from floor to roof.

The estate-type tailgate can be fully opened without inconveniencing pedestrians or passing traffic. It can be opened in exceptionally narrow locations, and also assists with shelter from the rain when loading or unloading.

On top of all that, rearward visibility can be maintained in bad weather by the heated rear window and wash/wipe that are standard equipment.

Maximum cargo height is 32.0", floor width is 51.0" (38.0" between the wheelarches). The total loadspace length is 60.0" ...

The van illustrated is an Escort Combi.

The Escort Combi's reclining seats are trimmed in Lorenzo fabric; other features include a soft-feel two-spoke steering wheel, cigar lighter and ashtray.

The tailgate seals a load aperture 29 inches high and 39 inches wide at floor level.

Like the big, wide-opening front doors, the tailgate has a special high-security lock shared with the rest of the 1986 Escort range.

High-tech locks are typical of the Combi's advanced design features.

Strong in itself, Ford's new commercial vehicle is additionally protected by light but very strong and impact-resistant polycarbonate

Total loadspace capacity, measured using the V.I.A. method, is 42.4 cu. ft. (1200 litres).

bumpers. They are just the job for hustling, bustling delivery work in heavy traffic and confined spaces.

The latest 1.3 OHV engine, developed over tens of millions of customer-miles, delivers 60 PS at only 5000 rpm. Plenty of mid-range pull is provided by a torque curve which climbs to a 100 Nm maximum at 3000 revs. Electronic breakerless ignition specified on the 1.3 OHV engine and the new 1.4 CVH engine which is standard on the Combi Lt. This provides accurate timing and a powerful spark, assisting low cost of operation and giving the 1.4 CVH engine a power rating of 75 PS at 5600 rpm and a maximum torque of 109 Nm at 4000 rpm.

A five-speed gearbox is part of the package when you go for the refined, quick-starting and remarkably frugal 1.6 diesel. It produces 54 PS at 4800 revs and 95 Nm at 3000.

Drivers will appreciate the neat instrument panel, convenient controls, excellent stowage space and other key features shared by all 1986 Escorts. The standard Combi has fleece carpet for the front compartment, Ford's P21 push-button radio and supportive seats trimmed with smart, hard-wearing Lorenzo fabric.

Trimmed and equipped to an even higher standard, the Combi Lt comes complete with velour carpet, a cigar lighter, stylish full wheel covers, fully adjustable head restraints, and the 1.4 CVH 'lean burn' engine which is available with an optional five-speed gearbox, alternatively the 1.6 diesel may be specified.

\*Loadspace capacities measured using the V.I.A. method.

† NOTE: The Escort Combi Lt will be available later, please consult your Ford Dealer.

## SPECIFICATIONS

Engine	1.3 OHV	1.4 OHV	1.6 diesel
Capacity	1297	1392	1608
Cylinders	4	4	4
Compression ratio	9.3:1	9.5:1	21.5:1
Carburettor / fuel injection	Single variable venturi	Twin venturi	Indirect mechanical injection
Choke	Manual	Manual	Glow-plug pre-warm with warning light
Ignition	Electronic	Electronic	Compression
Max. power DIN kW (PS) at rpm	44 (60)/5000	55 (75)/5600	40 (54)/4800
Max. torque DIN Nm (MKP) at rpm	100 (10.2)/3000	109 (11.1)/4000	95 (9.7)/3000

Basic Weights (no options)	COMBI		COMBI L	
	Kg	Kg	Kg	Kg
GVW	1350	1350	1425	1425
Kerbweight**	670	675	945	945
Total carrying capacity	480	475	480	480
Payload (evenly distributed)†	350	350	350	350
Permissible axle loads: Front axle	700	700	725	725
Rear axle	750	750	750	750

\*\*Subject to manufacturing tolerances.

†The marked payload is theoretical only and is based on vehicles with minimum equipment. Payload is calculated by subtracting the kerbweight of the actual vehicles plus the actual weight of the driver and passengers, if any, from the GVW. Account should then be taken of the weight distribution and axle loading. It is the responsibility of the users to operate the vehicle within the plated weights.

## STANDARD FEATURES

ENGINEERING	COMBI	COMBI L
1.3 OHV	■	■
Four-speed gearbox	■	■
